PROFILE

Detail oriented and adaptable software developer with hands on experience building real world, user focused applications.

TECHNICAL SKILLS

Languages: Java, JavaScript, Dart

Frontend: React, HTML, CSS, Tailwind, Flutter

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Tools: Git, GitHub, Chapa Payment Integration, Deployment, Maintenance

PROJECTS

PharmaEt (Mobile Application)

- Developed a cross platform Flutter application with user centric UI for skincare and medical supplies.
- Finalizing the integration of the Chapa payment gateway for secure, localized digital transactions.

QuickRunner Website (Multi shop Ordering Platform)

- Built a system allowing multiple shops to post and manage products from a single unified platform.
- Implemented structured cart handling and integrated WhatsApp based order forwarding to delivery runners.

Fresh Fashion Website (E commerce Showcase)

- Built a responsive product showcase website with detailed product pages and WhatsApp integration.
- Developed a custom admin panel for monitoring statistics and managing site operations.

Zemen Event Management System

- Contributed to a team-based development of a website event management system.
- Implemented event registration modules and administrative management features.
